

CLAIMS

I claim:

1. (Canceled)
2. (Previously presented) The method according to claim 38 wherein a contractor is provided with said authorization code that is presented at a bid letting along with said contractor's bid, said authorization code permitting an owner/obligee to receive an approved bond through said computer network.
3. (Previously presented) The method according to claim 38 wherein the bond is a surety bond.
4. (Previously presented) The method according to claim 38 wherein the bond is a bid bond.
5. (Previously presented) The method according to claim 38 wherein the bond is a contract bond.
6. (Previously presented) The method according to claim 38 wherein the bond is a court bond.
7. (Previously presented) The method according to claim 38 wherein the bond is a subdivision bond.
8. (Previously presented) The method according to claim 38 wherein the bond is a performance bond.
9. (Previously presented) The method according to claim 38 wherein the bond is a customs bonds.
10. (Previously presented) The method according to claim 38 wherein the bond is a notary bond.
11. (Previously presented) The method according to claim 38 wherein the bond is a liquor license bond.
12. (Previously presented) The method according to claim 38 wherein the bond is a license

Application No. 09/694,776
bond.

13. (Previously presented) The method according to claim 38 wherein the bond is a permit bond.

14. (Previously presented) The method according to claim 38 wherein the bond is a Small
Business Administration bond.

15. (Previously presented) The method according to claim 38 wherein the bond is a bail bond.

16. (Previously presented) The method according to claim 38 wherein the bond is a supersedeas
bond.

17. (Previously presented) The method according to claim 38 wherein the network is accessed by
a password and the bond is accessed by said authorization code.

18-19. (Canceled)

20. (Previously presented) The system according to claim 41 wherein a contractor is provided
with said authorization code that is presented at a bid letting along with said contractor's bid,
said authorization code permitting an owner/obligee to receive an approved bond through said
computer network.

21. (Previously presented) The system according to claim 41 wherein the bond is a surety bond.

22. (Previously presented) The system according to claim 41 wherein the bond is a bid bond.

23. (Previously presented) The system according to claim 41 wherein the bond is a contract
bond.

24. (Previously presented) The system according to claim 41 wherein the bond is a court bond.

25. (Previously presented) The system according to claim 41 wherein the bond is a subdivision
bond.

26. (Previously presented) The system according to claim 41 wherein the bond is a performance

Application No. 09/694,776
bond.

27. (Previously presented) The system according to claim 41 wherein the bond is a customs bonds.

28. (Previously presented) The system according to claim 41 wherein the bond is a notary bond.

29. (Previously presented) The system according to claim 41 wherein the bond is a liquor license bond.

30. (Previously presented) The system according to claim 41 wherein the bond is a license bond.

31. (Previously presented) The system according to claim 41 wherein the bond is a permit bond.

32. (Previously presented) The system according to claim 41 wherein the bond is a Small Business Administration bond.

33. (Previously presented) The system according to claim 41 wherein the bond is a bail bond.

34. (Previously presented) The system according to claim 41 wherein the bond is a supersedeas bond.

35. (Previously presented) The system according to claim 41 wherein the network is accessed by a password.

36-37. (Canceled)

38. (Currently amended) A method of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said method comprising:

- a) ~~an agent who receives~~ receiving a request on said agent's computer for a surety bond from an applicant, said surety bond being required from said applicant by a third party, using [a] said computer network to select a surety from one or more sureties that have

Application No. 09/694,776

approved said agent to issue surety bonds on said surety's behalf;

- b) providing said surety over [a] said computer network with the identity of said applicant requesting said bond and such other information said surety may require about said applicant so that a surety bond may be issued by said surety;
- c) requesting from said surety over said computer network a decision on whether the bond is approved said request being received on said surety's computer;
- d) receiving from said surety over said computer network a decision on whether the bond is approved said decision being transmitted from said surety's computer, and being received on said agent's computer;
- e) where said bond request is approved by said surety, said surety providing an authorization code said authorization code being transmitted from said surety's computer over said computer network for an approved bond to said applicant;
- f) submitting said authorization code to a third party requiring said bond said third party receiving said authorization code on said third party's computer;
- g) permitting said third party requiring said bond to use said authorization code over said computer network to access said bond issued by said surety said bond being accessed from said third party's computer;
- h) ~~said surety~~ issuing from said surety computer said bond through said computer network to said third party after receipt of the authorization code said third party receiving said bond on said third party's computer.

39. (Currently amended) A method of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party

Application No. 09/694,776
computer, said method comprising:

- a) ~~an agent who receives~~ receiving a request for a surety bond on said agent's computer using a computer network to select a surety from one or more sureties that have approved agent to issue surety bonds on said surety's behalf;
- b) providing said surety on said surety's computer with the identity of a contractor and such other information said surety requires about said contractor and said bond over a said computer network;
- c) selecting the bond over said computer network said surety using said surety's computer;
- d) providing said surety with information, over said computer network, said surety receiving said information on said surety's computer, on a contract to be performed by said contractor for which [a] said bond is required;
- e) receiving from said surety a decision on whether the bond is approved, said decision being transmitted from said surety's computer, and being received on said agent's computer;
- f) providing an authorization code, over said computer network, for an approved bond to said contractor to be submitted with said contractor's bid;
- g) permitting a third party that requires said bond to use said authorization code, over said computer network, to obtain the bond issued by said surety, said third party receiving said authorization code on said third party's computer.

40. (Currently amended) A method of obtaining information concerning a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said method comprising:

Application No. 09/694,776

~~providing~~ inputting into [a] said computer network [with] the identity of an applicant who requested a bond and such other information about said applicant that is requested by said surety;

selecting said surety, over said computer network;

said surety making a decision on whether to issue a bond on the applicant's

Information provided to said computer network, said surety using said surety's computer to transmit said decision over said computer network;

said surety providing said computer network with an authorization code for an approved bond, said surety using said surety's computer to transmit said authorization code over said computer network;

~~a third party who receives~~ receiving said authorization code ~~accessing on said~~ third party's computer from said computer network by providing said network with said authorization code;

~~said third party~~ obtaining from said computer network information concerning said bond said information being received on said third party's computer.

41. (Currently amended) A system of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said system comprising:

- a) a means for an agent to select a surety, over said computer network, from one or more sureties that have approved said agent to issue surety bonds over said computer network on said surety's behalf, said agent using said agent's computer to select said surety;
- b) a means for providing said surety, over said computer network, with the identity of an

Application No. 09/694,776

- applicant requesting said bond and such other information said surety require about said applicant over a computer network, said surety using said surety's computer to receive said identity of said applicant and said other information required by said surety;
- c) a means for requesting from said surety over said computer network a decision on whether the bond is approved, said decision being transmitted from said surety's computer to said computer network;
- d) a means for providing an authorization code for an approved bond to said applicant to be submitted to a third party requiring said bond, said third party using said third party's computer to receive said authorization code;
- e) a means for permitting said third party requiring said bond to use said authorization code over said computer network to access said bond issued by said surety;
- f) a means for issuing said surety bond through said computer network to said third party after receipt of the authorization code, said third party using said third party's computer to receive said issued bond.

42. (Currently amended) A system of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said system comprising:

- a) a means for selecting a surety, over said computer network from one or more sureties that have approved an agent to issue surety bonds over said computer network on said surety's behalf, said agent using said agent's computer to select said surety;
- b) a means for providing, over said computer network said surety with the identity of a contractor and such other information said surety may require about said contractor over a

Application No. 09/694,776

computer network, said surety using said surety's computer to receive said identity of said

contractor and said other information required by said surety;

c) a means for selecting the type of bond requested by said contractor over said computer network;

d) a means for providing said surety over said computer network with information on a contract to be performed by said contractor for which a bond is required, said surety using said surety's computer to receive said information on said contract;

e) a means for requesting from said surety over said computer network a decision on whether the bond is approved, said request being received by said surety's computer ;

f) a means for providing an authorization code for an approved bond over said computer network to said contractor to be submitted with said contractor's bid;

g) a means for permitting a third party that requires said bond to use said authorization code to obtain the bond issued by said surety over said computer network, said third party receiving said authorization code on said third party's computer.

43. (Canceled)

44. (Previously presented) The method according to claim 38 wherein said agent provides said surety with a name of a contractor, said contractor's address, the identity of an owner/ obligee for whom the bond is required, an identification of the bond form required, an estimated contract price, an amount of the bid security, a contract number or IFB number, and a description of the job.

45. (Previously presented) The method according to claim 44 wherein said owner/obligee is a governmental agency, a private owner, a construction manager, or a general contractor.

46. (Currently amended) A method of obtaining a surety bond over a computer network, said

Application No. 09/694,776

computer network comprising, at least an agent computer, a surety computer, and a ~~third party~~
owner/obligee computer, said method comprising: ~~comprising:~~

an applicant for a bond said applicant accessing a website of a bonding agent through a login and a password;
